PERSONAL PROJECTS

XtremeKick E-Commerce Website (Pure PHP)

- A web application which sells soccer shoes and related products online.
 - User-friendly design, intuitive navigation and responsive.
 - Two panels: admin and user.
 - Includes Sign-in/Sign-up for authentication, add to cart, product filtering, fake payment, etc.
- Github - <https://github.com/kokonaung-kkn/Commerce>
Demo - <https://xtreme-kick.000webhostapp.com/>

Mini Customer Relationship Management (PHP – Laravel)

- A web application which manages the project-based relationship between customers and staffs.
 - Support multi-authentication and authorization.
 - Include CRUD, search features, and project room.
 - Provides complete dashboard and business reports.
- Github - <https://github.com/kokonaung-kkn/CRM>

Airline Seat Booking - SPA (Pure JavaScript)

- A web page which allows user to select passenger and allocate seats.
 - The system respect previous seat booking and shows the price breakdown and the total as users select and unselect seats.
 - The system changes "skip seats" to "continue" when a seat selection is complete.
 - Plays with JSON data using JavaScript.
- Github - <https://github.com/kokonaung-kkn/Airline-Seat-Booking>
